GSTARP

Clear tents fabric -Factory wholesale

Clear tents fabric is a super transparent PVC film, produced by laminating process, no flow marks, double-sided smooth polishing, wear-resistant surface, with high strength, a long service cycle, and will not turn yellow. It has very strong resilience. It is often used to make tents/tent side curtain fabric, etc., to meet the requirements of cold resistance/corrosion resistance/UV resistance/aesthetics. Clear tents fabric completely does not block the light, has a good view, people enjoy the beautiful scenery outside at the same time is not affected by the weather. It keeps the temperature constant in a given space, with good comfort.

 Very strong toughness

 Corrosion resistance/UV resistance/aesthetic

 No light blockage, good field of view

 Keep the temperature constant

 Good comfort

Super Tear Strength

Super Tensile Strength

How to Choose the Right Clear Tent Fabric Based on Needs?

- ▶ Clear Tent Fabric is 100% waterproof and UV-resistant, making it ideal for outdoor use, such as parties, weddings, exhibitions, and other public events.
- ▶ Clear Tent Fabric weighing 300–500g is lightweight and generally used for short-term or indoor purposes, as well as temporary tent setups.
- ▶ Weights above 650g are considered heavy-duty Clear Tent Fabric, suitable for long-term outdoor installations. This fabric is highly durable and can withstand extreme weather, making it ideal for high-intensity environments.
- ▶ The standout feature of Clear Tent Fabric is its aesthetic appeal, providing excellent light transmission. This makes the entire venue appear more upscale, enhancing the atmosphere.
