Jiaxing Green Shield New Materials Co., Ltd

PVC Drop stitch fabric is also called PVC Double wall Fabric, It is a r new material with high production cost, used for outdoor products and sports equipment, with a special structure, as shown in the schematic below, it is a 5D design, connecting the upper and lower PVC surface layers through polyester threads totaling tens of thousands of threads, and the overall structure can be divided into 7 layers, as the polyester threads in the middle are longer and equal in length, so this forms a sturdy integral entity, with a flat surface when inflated. The company has also developed TPU drop stitch fabric, which is mainly used in food and medical applications.

Professional sales team, Over 10years OEM&ODM finished product experience, Gemeny production lines, Automatic computer colour meching system, Advanced inspection process, Imported pvc resin, Can deliver what exactly client need.

GSTARP

Features of PVC Double wall Fabric

Strong adhesion

By means of strict product formulation, increase the molecular penetration of the coating and the base in the process, make the film and the coating combined. The molecular bond in the middle of the formation of a one-piece, become a unit, after thousands of times of folding, ensuring that the surface layer and the base cloth will not fall off, tear strength can reach 150N/square meter.

Flame retardance

GSTARP is manufactured with the highest quality flame retardants, although the highest grades are expensive, which ensure that the product is flame retardant, self-extinguishing when removed from the flame.

Anti-bacterial and anti-mold

Using special chemical additives, we ensure that all our products have good anti-bacterial and anti-mold effects, do not produce mold in humid and warm environments, maintain the stability of the surface, and do not produce unpleasant odors, prolonging the use of the life of the product.

Anti algae

GS PVC vinyl is often used in the field of water-contact areas, especially for water storage containers, aquaculture, fish farming, are required to prevent algae, in the manufacturing of the upper and lower bottom molds, GS has specially added additives to prevent algae, so the tarpaulin is algae-proof.

Price advantage

Softness and excellent hand feel

Air tightness
