Fish tank fabric-Factory wholesale

Fish tank fabric is a 100% waterproof and abrasion-resistant material that plays a crucial role in aquaculture and fish transportation. It is typically used in combination with steel frames for quick installation, maximizing the use of farming space and offering excellent economic benefits. The fabric is highly durable, with excellent resistance to abrasion and punctures. It is easy to maintain, environmentally friendly, and odorless, preventing algae growth and ensuring water quality remains safe and unchanged.

The weight range of 500–600gsm is suitable for household or small fish ponds, while 700–900gsm is suitable for large fish ponds or commercial fish ponds. It has stronger tear resistance and durability, can withstand greater water pressure, and is suitable for harsh environments such as long-term sun exposure and severe cold. Deep sea aquaculture requires stronger fabrics.

Be sure to choose environmentally friendly PVC materials to avoid polluting fish and water quality.
