## Oil fence fabric – Factory wholesale

Professional sales team, over 15 years experience in producing PVC Greenhouse Fabric, Over 10 years OEM&ODM finished product experience, we are a factory produces pvc tarpulin in Haining, The greatest feature of our Tarp for PVC Greenhouse Fabric is stable and durable quality.

**UV resistant**

**Airtightness**

**Heat insulation**

**Durability**

## Oil fence fabric – Factory wholesale

Flexible vinyl duct is manufactured by the process of scraping and coating, this material has high anti-static requirements, our anti-static grade can reach 10E6. In the production process, antimony trioxide fire retardant material, fire rating up to EU and US standards. The material is characterized by wear-resistant, long life cycle, flexible, lightweight, waterproof, strong environmental adaptability, etc., which is common in mines, industrial mining, tunnels, airports, household kitchens and so on.

### UV resistant:

The GSTRP PVC tarps are all UV-protected, which is a very important feature for it, by taking into account the surface and coating, it consists of a 6-layer barrier against UV rays.

### Airtightness:

Our coated cloth is equipment imported from Germany, the new advanced process to make the coating and the basic tightly combined, through the oven and tunnel furnace heating and shaping, has a very good airtightness, windproof effect, with good airtightness, it can be used as a large odd storage device.

### Heat insulation:

The PVC coated fabric is formulated so that the coating is flame retardant, an extra layer of security is added to protect against sub-ultraviolet rays, and has good insulation against heat sources.

### Durability:

The PVC coated fabric is produced by imported equipment, the product structure is advanced, has a solid surface, has a strong resistance to prevent tear, this is one of the biggest features of our products, the quality is very stable, with long life cycle, there is a very excellent durability.

You can get the reasonable price with best quality here.

### ► The Benefits of Using Flexible Vinyl Ducts in HVAC Systems

- The application of Flexible Vinyl Duct in HVAC system has the following advantages
- Flexible Vinyl Duct has good UV and corrosion resistance, 100% waterproof, and can be used in a variety of environments without corrosion.
- High strength and wear resistance, durability can resist inflation for a long-term stable use.
- It is suitable for all kinds of bridges, mines and tunnels, greatly reducing the cost.

### ► Choosing the Right Fabric for High-Speed Doors

- Here are a few factors to consider when choosing a High Speed Door Fabric:
- High quality PVC fabric has strong impact resistance, weather resistance, UV resistance, wear resistance, tear resistance, and high strength, and can cope with the wear caused by frequent use, with good durability. It can also be used normally in direct sunlight.
- PVC fabric is 100% waterproof and can be used in wet and rain environments to prevent moisture penetration and block humid air.
- The use temperature range of PVC fabric is cold-hot 40–70° C, which ensures that the High Speed Door can be used normally in high temperature or extremely cold environment.
- High Speed Door fabric has good flexibility, can be used at high frequency, with fast opening and closing as well as high work efficiency.
