

## High speed door fabric –Factory wholesale

High speed door fabric PVC resin and polyester fabric layer laminated, or by scraping process production, is a medium and heavy duty tarp, weight from 800gsm–2000gsm. With high strength, waterproof, durable, tear resistance, folding resistance and other characteristics. It has high intensity and is common in warehouses, unloading docks, factories, logistics, business centers and other fields, which isolates bad weather and dust, rapidly isolate space, and reduce energy waste, with excellent sealing effect.

### Properties of High speed door fabric:

👍 Durable

👍 Long life

👍 Fire retardent

👍 heat insulation

👍 Colour fastness

👍 Folding resistant

👍 Environmentally friendly

👍 Super Adhension strength

👍 Acid and alkali resistance

👍 Scratch and abrasion resistance

### Applications:

Warehouse, logistics center,  
food factory, workshop door,  
cold storage door,  
temperature controlled warehouse door,  
loading and unloading dock,  
repair shop door, airport door,  
station, parking lot entrance,  
laboratory door, clean room door,

### Choosing the Right Fabric for High-Speed Doors

Here are a few factors to consider when choosing a High Speed Door Fabric:

High quality PVC fabric has strong impact resistance, weather resistance, UV resistance, wear resistance, tear resistance, and high strength, and can cope with the wear caused by frequent use, with good durability. It can also be used normally in direct sunlight.

PVC fabric is 100% waterproof and can be used in wet and rain environments to prevent moisture penetration and block humid air.

The use temperature range of PVC fabric is cold-hot 40-70° C, which ensures that the High Speed Door can be used normally in high temperature or extremely cold environment.

High Speed Door fabric has good flexibility, can be used at high frequency, with fast opening and closing as well as high work efficiency.

### UV resistant:

The GSTRP PVC tarps are all UV-protected, which is a very important feature for it, by taking into account the surface and coating, it consists of a 6-layer barrier against UV rays.

### Heat insulation:

The PVC coated fabric is formulated so that the coating is flame retardant, an extra layer of security is added to protect against sub-ultraviolet rays, and has good insulation against heat sources.

### Durability:

The PVC coated fabric is produced by imported equipment, the product structure is advanced, has a solid surface, has a strong resistance to prevent tear, this is one of the biggest features of our products, the quality is very stable, with long life cycle, there is a very excellent durability.

### Cold resistance:

The GSTRP PVC tarpaulin has good cold resistance, the lowest can be -60 degrees, it is leading in the industry, we have special cold resistance test instrument.
