Jiaying Green Shield New Materials Co., Ltd

## Inflatable exhibition booth tarp–Factory wholesale

- ▶ Inflatable exhibition booth tarp is a synthetic fabric coated on both sides or laminated with PVC layers. It is lightweight, durable and flexible. This is a recently popular new product, captured the attention of major exhibitors, fast to build, very innovative. PVC is a high-quality environmental protection material, odorless and recyclable, in line with the vision of environmental protection.

- ▶ Inflatable design can make the booth shape novel and changeable, easily attract the audience, and enhance the brand image.
- ▶ Meanwhile, its tensile printable and tear resistance make it excellent for both indoor and outdoor use.

Tear Strength Warp	N/5cm	DIN 53363	280	300	300	150
Tear Strength Weft	N/5cm	DIN 53363	250	270	270	125
Adhesion	N/5cm	DIN 53357	90	120	120	100
Temperature range	°C	DIN 53368	-30~+70°C	-30~+70°C	-30~+70°C	-30~+70°C
Fire Retardant		Self-extinguishing	Both sides lacquering	Both sides lacquering	Embossing	

#### Super Tear Resistance:

GSTRP uses the high mesh density polyester fabrics and compilation fabrics, via the production process of coated or knife coated, add a variety of additives, including but not limited to stabilizers, plasticizers, fire retardants, etc., so that the tarpaulin has a very strong tear resistance, tear strength can reach 400N / square meter.

#### Strong adhesion:

By means of strict product formulation, increase the molecular penetration of the coating and the base in the process, make the film and the coating combined. The molecular bond in the middle of the formation of a one-piece, become a unit, after thousands of times of folding, ensuring that the surface layer and the base cloth will not fall off, tear strength can reach 150N/square meter.

#### Flame retardance:

GSTARP is manufactured with the highest quality flame retardants, although the highest grades are expensive, which ensure that the product is flame retardant, self-extinguishing when removed from the flame.

#### Acid resistance:

GSTRP factory produce PVC fabric by lamination or coating, our equipment is imported from Germany, with advanced techniques, during the manufacturing process of PVC FABRIC, specialized additives are added to make the product acid resistant. Customers can use it to store substances containing acids and alkalis.
