Heat insulation

The PVC coated fabric is formulated so that the coating is flame retardant, an extra layer of security is added to protect against sub-ultraviolet rays, and has good insulation against heat sources.

Durability

The PVC coated fabric is produced by imported equipment, the product structure is advanced, has a solid surface, has a strong resistance to prevent tear, this is one of the biggest features of our products, the quality is very stable, with long life cycle, there is a very excellent durability.

Scratch resistant

The PVC coated fabric is a kind of liquid PVC uniformly coated on top of the base cloth, the upper and lower two two surfaces are smooth and strong, and polyester base cloth on the high strength, can prevent sharp objects scratch or puncture, with good scratch resistance.

Wear-resistant

The fabric surface is very smooth, the surface coating is arranged tightly via surface acrylic or PVDF treatment techniques, the hardness is very high, resisting all kinds of wear and tear, so it is very wear-resistant.

Wear resistant and
