## Customization is also possible

PVC container fabric, also known as flexible containers, mobile containers, or tanks, is used to create water tanks and can be integrated with shipping containers and trucks for easy transportation and access. PVC container bags are durable, with high abrasion resistance, strength, waterproofing, corrosion resistance, and sealing properties. These features make them suitable for long-distance transport and harsh environments, ensuring safe and damage-free delivery of goods. They are commonly used in remote areas such as forests, farms, engineering projects, oil fields, disaster relief, firefighting, deserts, and military operations.

# PVC container fabric – Factory wholesale

## Applications:

swimming pool, Agriculture, forestry, irrigation, emergency, firefighting, aquaculture, military, storage, chemical storage, fuel storage, water tanks, desert water storage, liquids bag, liquids storage.

## Features:

Durable, Puncture resistant, Super tensile strength, Super tear strength.

Superior UV Protection

Easy to clean

No odor

light tight

# PVC container fabric – Factory wholesale

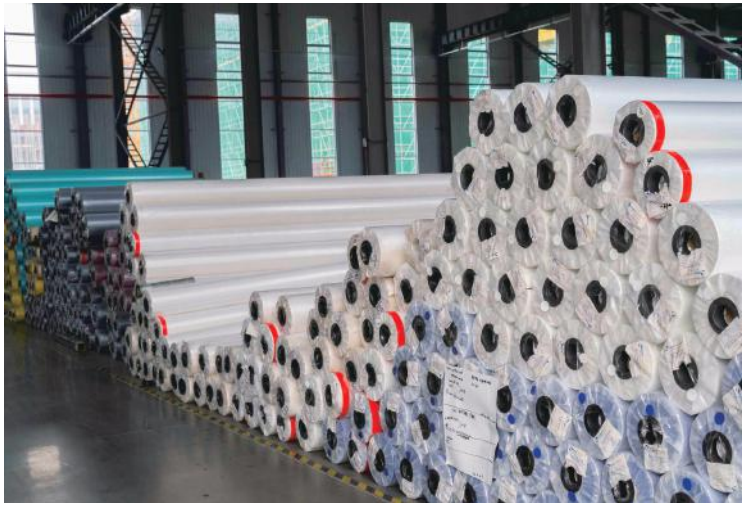

GSTARP

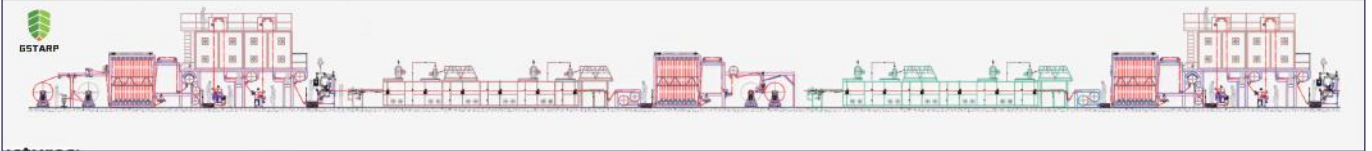

Professional sales team, over 15 years experience in producing PVC bottom fabric, Over 10 years OEM&ODM finished product experience, we are a factory produces pvc tarpulin in Haining, The greatest feature of our PVC bottom fabric is stable and durable quality.

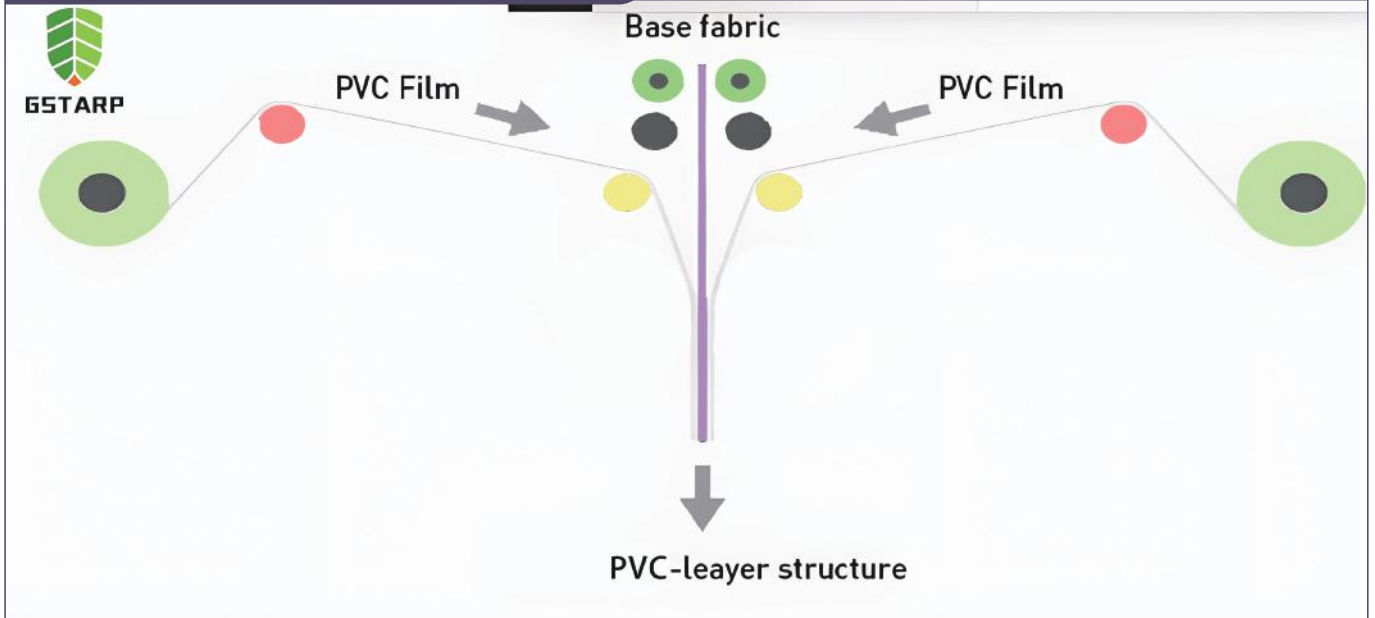

Welcome to  
**OURFACTORY**

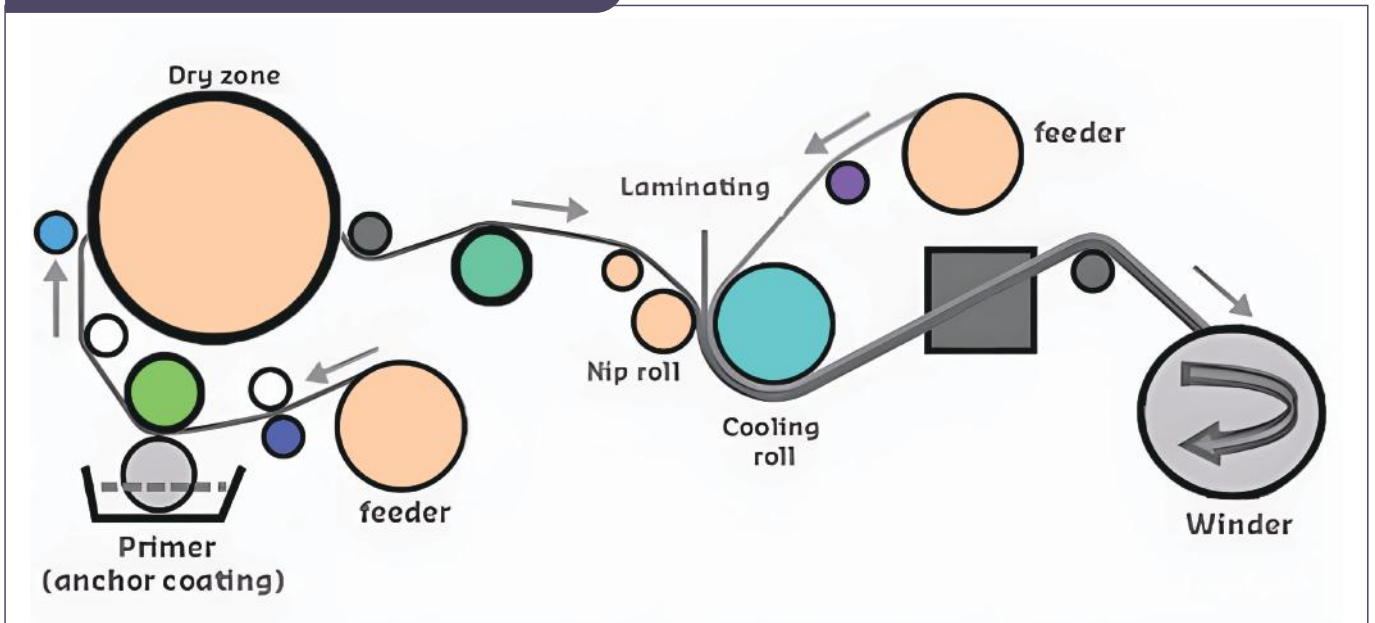

## PVC container fabric structure :

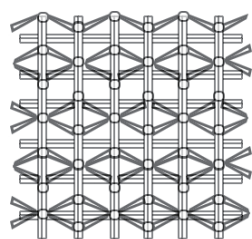

## PVC Laminated Tarpaulin Production Process

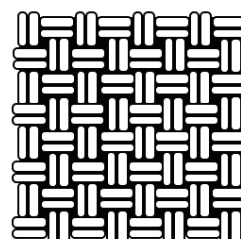

## PVC Coated Tarpaulin Production Process

## Fabric structure

basefabric construction

woven polyester fabric

Properties	Units	Test method	900sm	1050gsm	1100gsm	1250sm	1350gsm
			Average value	Average value	Average value	Average value	Average value
Base Thread Density	Denier	DIN53350	1000D*1000D	1000D*1000D	1300D*1300D	1500D*1500D	1500D*1500D
Base Fabric Density	Thread/inch	DIN53351	28*26	30*30 Panama	30*30 Panama	30*30 Panama	30*30 Panama

## Properties of PVC container fabric:

- ▶ Durable / Long life
- ▶ Anti mold / heat insulation
- ▶ Colour fastness / Smooth surface
- ▶ 100%waterproof
- ▶ Puncture resistant
- ▶ Alcohol resistance
- ▶ Dimensional stability
- ▶ Environmentally friendly
- ▶ Super Adhesion strength

1

### Durability:

The PVC coated fabric is produced by imported equipment, the product structure is advanced, has a solid surface, has a strong resistance to prevent tear, this is one of the biggest features of our products, the quality is very stable, with long life cycle, there is a very excellent durability.

2

### Airtightness:

Our coated cloth is equipment imported from Germany, the new advanced process to make the coating and the basic tightly combined, through the oven and tunnel furnace heating and shaping, has a very good airtightness, windproof effect, with good airtightness, it can be used as a large odd storage device.

3

### Wear-resistant:

The fabric surface is very smooth, the surface coating is arranged tightly via surface acrylic or PVDF treatment techniques, the hardness is very high, resisting all kinds of wear and tear, so it is very wear-resistant.

4

### Long lifetime:

Produced by coating or coating process, the product structure is stable, quality is stable, with strong durability, to ensure economic returns, the product has a very good service life, over 10years.
