PVC Greenhouse Fabric is a super transparent PVC film, produced by laminating process, no flow marks, double-sided smooth polishing, wear-resistant surface, with high strength, a long service cycle, which will not turn yellow.

It features transparency, which does not block light at all, waterproof/wear-resistant, and is often used in the fields of greenhouse/raincoat/packaging bag/bags and suitcases/machine cover/rainproof film. It has unique application value in the field of agricultural /flower greenhouse, with good water resistance and transparency, sunlight can easily pass through, which is conducive to plant photosynthesis and improve growth efficiency. Convenient management, work efficiency. If you farm flowers, you can enjoy the beautiful flowers directly outside.

- 👍 High strength
- 👍 long service life
- 👍 will not turn yellow

PVC Greenhouse Fabric-Factory wholesale

GSTARP

Professional sales team, over 15 years experience in producing PVC Greenhouse Fabric, Over 10 years OEM&ODM finished product experience, we are a factory produces pvc tarpulin in Haining, The greatest feature of our Tarp for PVC Greenhouse Fabric is stable and durable quality.

*You can get the reasonable price
with best quality here.*

Airtightness:

Our coated cloth is equipment imported from Germany, the new advanced process to make the coating and the basic tightly combined, through the oven and tunnel furnace heating and shaping, has a very good airtightness, windproof effect, with good airtightness, it can be used as a large odd storage device.

Heat insulation:

The PVC coated fabric is formulated so that the coating is flame retardant, an extra layer of security is added to protect against sub-ultraviolet rays, and has good insulation against heat sources.

Durability:

The PVC coated fabric is produced by imported equipment, the product structure is advanced, has a solid surface, has a strong resistance to prevent tear, this is one of the biggest features of our products, the quality is very stable, with long life cycle, there is a very excellent durability.

Scratch resistant:

The PVC coated fabric is a kind of liquid PVC uniformly coated on top of the base cloth, the upper and lower two two surfaces are smooth and strong, and polyester base cloth on the high strength, can prevent sharp objects scratch or puncture, with good scratch resistance.

Wear-resistant:

The fabric surface is very smooth, the surface coating is arranged tightly via surface acrylic or PVDF treatment techniques, the hardness is very high, resisting all kinds of wear and tear, so it is very wear-resistant.
