2

Opaque:

By adding chemical additives, we can make it completely opaque.

3

No heavy metals:

Complying with EU standards and strictly controlling raw materials and production process, fabric has no heavy metals and fully compliant with the standards.

4

Softness & excellent feeling:

By controlling the density of polyester fiber cloth and the thickness of the upper and lower coatings, together with the chemical additives, we make the softness that meets the customer's requirements. With the professional surface treatment process, fabric feels excellent to the touch.

5

Super Tear Resistance:

GSTRP UES the high mesh density polyester fabrics and compilation fabrics, via the production process of coated or knife coated, add a variety of additives, including but not limited to stabilizers, plasticizers, fire retardants, etc., so that the tarpaulin has a very strong tear resistance, tear strength can reach 400N / square meter.

6

Tensile strength :

The key to tensile strength lies in the choice of polyester fabric and woven fabric, while the density and diameter of the warp and weft threads are very important. Our products have good tensile strength, which is an important indicator of product quality, and the tensile strength can reach 6000N/square meter.
