Windproof fence

Windproof fence tarp falls into mesh fabric and PVC tarpaulin, which can meet different requirements. There are holes in the middle of mesh fabric, which can maintain ventilation and not block light, while reducing wind impact, suitable for scenes with high wind and broaden horizon.

PVC Windproof fence can block the light, wind and UV resistant at the same time to provide privacy protection, which is the best choice to resist bad weather.

Windproof fence is easy to install and maintain, a variety of colors and sizes are available, suitable for stadium sites or outdoor events.

➔ PVC Windproof Fence Solutions and Innovative Design ➔

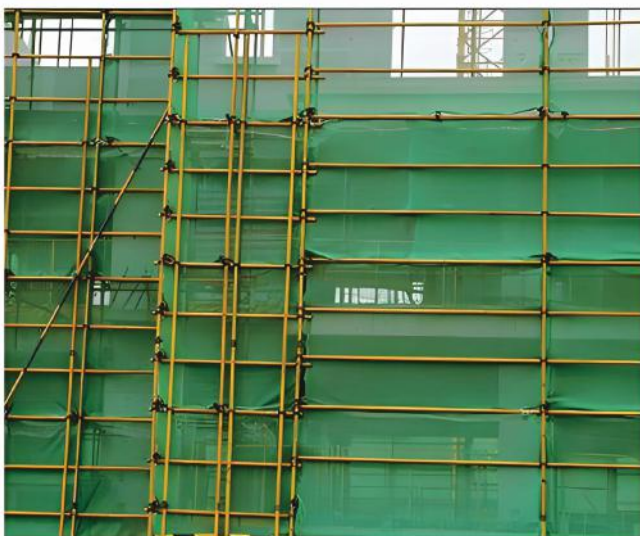

- 1 The PVC Windproof Fence is designed to provide privacy and protection against strong winds, with quick installation, low cost, durability, wind resistance, and aesthetic appeal as key features of its innovative solutions.

- 2 Made from high-purity PVC compounded with high-strength polyester, the fence is extremely strong and highly resistant to wind. The mesh design ensures good ventilation, reducing wind resistance while allowing light to pass through, creating a visually appealing result.

- 3 Due to the soft nature of the PVC material, the fence is flexible and can be easily adjusted in height to meet varying environmental needs.

- 4 The advanced modular design of the PVC Windproof Fence allows for easy installation and dismantling, making transportation and storage convenient.

- 5 The fence is UV-resistant, corrosion-resistant, and made from environmentally friendly, odorless materials. It is durable and offers excellent cost-effectiveness.
